DBN EQUIPMENT

All the Equipment are periodically serviced and well maintained and calibration and certification of equipment carried out where required and all records of such calibration and Certification are maintained by Plant Department.

Maintenance and tracking of equipment and fleet is done by in-house Software which maintains complete movement and maintenance history of every DBN equipment and fleet.

Service Records and Movement Records are logged into the Data Base to maintain accurate and up to date information on each equipment.

A sample screen shot of the Data Base software is shown below. Also attached is sample calibration certificate of the corresponding equipment.
